# **1.** Qualitative Information on Quarterly Results

#### (1) Results of Operations

Overview of Consolidated Business Performance for the Six Months Ended June 30, 2021

During the six months ended June 30, 2021, the global economy continued to struggle amid the increasingly serious COVID-19 pandemic. The uncertainty over the economic outlook remained high also in Japan, as it was difficult to predict when the public health crisis brought about by the coronavirus would subside.

In the IT solutions arena in which the SIOS Group operates, however, companies continued to invest at an accelerated pace in implementing digital transformation (DX)1 solutions, including switching to teleworking and transitioning to cloud environments. In this favorable business environment, the Group pursued every growth opportunity by offering value-added products and services to corporate clients to assist them in moving forward with DX and by stepping up cross-selling efforts, following the realignment of Group companies.

The Group achieved consolidated business results by segment for the six months ended June 30, 2021, as follows:

#### (i) Open System Infrastructure Business Segment

As corporate clients continued to invest aggressively in implementing DX amid the COVID-19 crisis, the Group enjoyed strong sales of Red Hat Enterprise Linux2 and other software products sourced from Red Hat, Inc.3 The Group also achieved an increase in sales of its core LifeKeeper4. As a result, net sales in this segment soared 20.8% year on year to 5,054 million yen with a segment income of 215 million yen, compared with a segment loss of 5 million yen for the same period the previous year.

#### (ii) Application Business Segment

Revenues from software applications for MFPs5 grew year on year, supported by their increased sales in units and helped by the fact that the revenue from subscriptions6 for these applications signed on for by corporate clients during the previous fiscal year began to be recognized during the period under review. The Gluegent series7 also achieved a year-on-year increase in sales. In contrast, revenues from the provision of support for system development and implementation to financial institutions declined. In addition, as the web service business for broadcasters as well as the social and public outsourcing service business had been sold to outside the Group in the previous fiscal year, revenues from those two businesses were no longer counted toward segment sales for the period under review. As a result, net sales in this segment were down 2.2% year on year to 3,024 million yen.

The segment income was up 32.7% to 79 million yen, thanks primarily to the strong sales of products developed in-house, such as software applications for MFPs and Gluegent series products mentioned earlier.

The Group's combined net sales of these two segments jumped 11.0% year on year to 8,079 million yen, which marked the record-high first-half sales for the Group. The Company's consolidated quarterly operating profit jumped 443.2% to 295 million yen. The Company posted a consolidated quarterly ordinary profit of 316 million yen, up 446.0%, and a consolidated quarterly profit of 234 million yen attributable to owners of parent, compared with a profit of 19 million yen the previous fiscal year.

The Group's key management metrics EBITDA (the sum of operating profit, depreciation, and amortization of goodwill) and ROIC (ratio obtained by dividing operating profit after tax by the sum of shareholders' equity and interest-bearing debts) are as follows for the six months ended June 30, 2021:

EBITDA: 334 million yen, up 231.6% year on year

ROIC (annualized): 16.9%, compared with 3.5% for the same period the previous fiscal year

#### 1 Digital transformation(DX)

A process in which a company uses data and digital technology to transform its products, services, and business models to more effectively respond to constantly changing business environments and deliver greater value to customers and society as well as to transform its business processes and organizational structure and culture to gain greater competitive advantage.

2 Red Hat Enterprise Linux

Linux OS developed by the open solution provider Red Hat, Inc.

3 Red Hat, Inc. Related Items

Linux OS product developed by Red Hat, Inc., a provider of open source solutions.

4 LifeKeeper

A failover software product that automatically switches a failed primary server to a backup server.

5 Software application for multifunction printers

A multifunction printer (MFP) is a piece of office equipment that incorporates print, scan, copy, and fax capabilities into one unit. SIOS develops, markets, and updates Quick Scan and Speedoc, document management software applications running on an MFP.

6 Subscription business model

A business model that charges customers a recurring monthly or annual fee to access a software product or service.

7 Gluegent series

Service products designed to assist corporate clients in achieving greater operational efficiency using cloud solutions. The series includes the Gluegent Gate cloud-based management of user IDs, the Gluegent Flow cloud-based workflow system, and the Gluegent Apps Group Scheduler, which incorporated a function to manage schedules of team members into Google Calendar.
